

# Ambulant Toilet Cubicle Package

Ambulant Toilet Cubicles are designed for people with disabilities that may require the use of crutches and walking frames, or those that have sensory loss or arthritis. For male and female facilities with more than one standard toilet cubicle, a compartment suitable for use by a person with an ambulant disability must also be provided.

Representational image of an Ambulant Toilet Cubicle (internal and external view) including Metlam Australia Commercial Washroom Accessory products. Other layouts available.
